

Market	Product	Description	Image
CHAIN AND WIRE ROPE HOISTS	Electrically Released Brakes	Warner Electric's ERD brakes provide a reliable, cost-effective solution for power-off load holding. Ideal for dynamic stopping when power is lost, these brakes deliver heavy-duty braking with no residual torque in the disengaged position. Perfect for dry environments requiring dependable performance.	
GANTRY CRANES	Electrically Released Brakes	Warner Electric's ERD brakes provide a reliable, cost-effective solution for power-off load holding. Ideal for dynamic stopping when power is lost, these brakes deliver heavy-duty braking with no residual torque in the disengaged position. Perfect for dry environments requiring dependable performance.	
JIB WORKSHOP CRANES	CBCx-001 Switch	CBCx-001 power supply: AC rectifier with programmable Over-excitation voltage and integrated On/Off switch. Ideal for Elevator Brakes, ERD/ERS brakes. Can switch between full bridge and single wave rectification. Controlled by external PLC or board. Enables quick engagement for security applications.	
	Electrically Released Brakes	Warner Electric's ERD brakes provide a reliable, cost-effective solution for power-off load holding. Ideal for dynamic stopping when power is lost, these brakes deliver heavy-duty braking with no residual torque in the disengaged position. Perfect for dry environments requiring dependable performance.	
MONORAIL LIFTING SYSTEMS	Electrically Released Brakes	Warner Electric's ERD brakes provide a reliable, cost-effective solution for power-off load holding. Ideal for dynamic stopping when power is lost, these brakes deliver heavy-duty braking with no residual torque in the disengaged position. Perfect for dry environments requiring dependable performance.	
STEEL MILL CRANES	ERD ERDD Gen2 Electrically Released Brakes	Spring-Operated / Electromagnetic Release For Indoor / Outdoor Heavy Duty Applications	
	Electrically Released Brakes	Warner Electric's ERD brakes provide a reliable, cost-effective solution for power-off load holding. Ideal for dynamic stopping when power is lost, these brakes deliver heavy-duty braking with no residual torque in the disengaged position. Perfect for dry environments requiring dependable performance.	
	EUM-FBB Series Electrically Released Brake Modules	The EUM-FBB Brake Module is used in brake only applications and mounts between a C-face motor and a gear box or reducer. Available in four sizes.	

TOP SLEWING LIFTING CRANES			
	Electrically Released Brakes	Warner Electric's ERD brakes provide a reliable, cost-effective solution for power-off load holding. Ideal for dynamic stopping when power is lost, these brakes deliver heavy-duty braking with no residual torque in the disengaged position. Perfect for dry environments requiring dependable performance.	
TRAVELING BRIDGE CRANES	Electrically Released Brakes	Warner Electric's ERD brakes provide a reliable, cost-effective solution for power-off load holding. Ideal for dynamic stopping when power is lost, these brakes deliver heavy-duty braking with no residual torque in the disengaged position. Perfect for dry environments requiring dependable performance.	
TRUCK-MOUNTED AND CRAWLER CRANES	CBCx-001 Switch	CBCx-001 power supply: AC rectifier with programmable Over-excitation voltage and integrated On/Off switch. Ideal for Elevator Brakes, ERD/ERS brakes. Can switch between full bridge and single wave rectification. Controlled by external PLC or board. Enables quick engagement for security applications.	
	Electrically Released Brakes	Warner Electric's ERD brakes provide a reliable, cost-effective solution for power-off load holding. Ideal for dynamic stopping when power is lost, these brakes deliver heavy-duty braking with no residual torque in the disengaged position. Perfect for dry environments requiring dependable performance.
