

| Market           | Product                              | Description                                                                                                                                                                                                                                                                                                                                                        | Image                                                                                 |
|------------------|--------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|
| BAKERY SNACKS    | CLUTCH/BRAKE MODULES (EM,UM,EUM)     | Warner Electric's Unimodule Clutch/Brake modules provide the ultimate in application versatility, from rapid cycling and accurate positioning, to soft controlled starts and stops. These modules come completely pre-assembled, pre-aligned, and pre-burnished at the factory for maximum performance right out of the box.                                       |    |
|                  | WASHDOWN ELECTRO PACK                | Even in the most demanding environments, Warner Electric's Washdown Electro Pack Clutch/Brakes (EP-W) will weather the storm. Designed specifically for use in food, sanitary or any other washdown application, these packaged clutch/brakes are totally enclosed in smooth, completely sealed, rugged enclosures to keep wear particles in and contaminants out. |    |
|                  | WRAP SPRING CLUTCHES                 | Warner Electric offers a complete line of wrap spring clutches and clutch/brakes, which are particularly well suited for performing indexing, positioning and backstopping functions. Fast, repeatable and positive action provides identical cycling over a long life.                                                                                            |    |
| BOTTLING CAPPING | ELECTRO PACK CLUTCHES & BRAKES       | Packaged Performance Products are clutches and brakes which are assembled and aligned at the factory for maximum performance and ease of installation. Offered as clutches, brakes, and clutch/brake combinations, packaged products can be base mounted, shaft mounted, or installed on or between C-face motors and reducers.                                    |   |
|                  | MAGNETIC CAPPING HEADSETS AND CHUCKS | Warner Electric magnetic headsets feature constant Smooth Torque Technology; differing with most competitor OEM headsets that have two opposing magnets causing pulsating torque. It's the pounding effect of a pulsating clutch that increases cap tightness during the capping process.                                                                          |  |

|                     |                                  |                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                       |

| CANDY CONFECTIONARY | CLUTCH/BRAKE MODULES (EM,UM,EUM) | Warner Electric's Unimodule Clutch/Brake modules provide the ultimate in application versatility, from rapid cycling and accurate positioning, to soft controlled starts and stops. These modules come completely pre-assembled, pre-aligned, and pre-burnished at the factory for maximum performance right out of the box.                                                                           |    |
|                     | ENCLOSED UNIMODULE WASHDOWN      | Whether you clean your equipment with air, water, or a mild solution, many clutch/brakes may not weather the storm. Warner Electric's Enclosed UniModule Washdown series (EUM-W) represents the latest in clean, quiet, motion control technology, with sealed enclosures to keep wear particles in and contaminants out.                                                                              |    |
|                     | SENSORS AND SAFETY SWITCHES      | Warner Electric has many years of experience in applying sensors in motion control applications. Warner Electric's broad range of innovative and technologically advanced product range offers our customers the exact solution to satisfy their sensing applications.<br>Each model is individually identified with its own certification.<br>Documentation is available upon request.                |    |
|                     | TENSION BRAKES AND CONTROLS      | Warner Electric offers a comprehensive line of Tension Control products including electric and pneumatic friction brakes, magnetic particle and permanent magnet brakes, and both analog and digital controls. Several different types of brakes have been specifically designed for unwind/rewind/tension applications to provide consistent tension, even during flying splices and emergency stops. |   |
|                     | WRAP SPRING CLUTCHES             | Warner Electric offers a complete line of wrap spring clutches and clutch/brakes, which are particularly well suited for performing indexing, positioning and backstopping functions. Fast, repeatable and positive action provides identical cycling over a long life.                                                                                                                                |  |

|                          |                                  |                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                       |

| <b>CANNED GOODS</b>      | CLUTCH/BRAKE MODULES (EM,UM,EUM) | Warner Electric's Unimodule Clutch/Brake modules provide the ultimate in application versatility, from rapid cycling and accurate positioning, to soft controlled starts and stops. These modules come completely pre-assembled, pre-aligned, and pre-burnished at the factory for maximum performance right out of the box                                                                            |    |
|                          | CABLE PULL SWITCHES              | The SR cable pull switch is specially designed to provide personnel with ready access to a machine stop switch up to 245 feet away by simply pulling on the cable. This safety switch is ideal for use along conveyors or on the perimeter of large processing machinery. The machine will stop when the cable is pulled or when the cable breaks. The machine cannot start until the switch is reset. |    |
| <b>DAIRY</b>             | CLUTCH/BRAKE MODULES (EM,UM,EUM) | Warner Electric's Unimodule Clutch/Brake modules provide the ultimate in application versatility, from rapid cycling and accurate positioning, to soft controlled starts and stops. These modules come completely pre-assembled, pre-aligned, and pre-burnished at the factory for maximum performance right out of the box.                                                                           |    |

|              | STAINLESS STEEL CLUTCHES AND BRAKES | Caustic washdown solutions can cause corrosion and eventual failure in food processing applications such as meat and poultry. That's why Warner Electric developed a line of all stainless steel clutches and brakes. These units, featuring 400 series stainless steel bearings, are robust enough to handle the most hostile Washdown and tough enough to perform 24/7.               |   |
|              | WASHDOWN ELECTRO PACK               | Even in the most demanding environments, Warner Electric's Washdown Electro Pack Clutch/Brakes (EP-W) will weather the storm. Designed specifically for use in food, sanitary or any other washdown application, these packaged clutch/brakes are totally enclosed in smooth, completely sealed, rugged enclosures to keep wear particles in and contaminants out.                      |  |
