

Market	Product	Description	Image	Customer Name	Machine Name
Blisterpacking	CLUTCH/BRAKE MODULES (EM,UM,EUM)	Warner Electric's Unimodule Clutch/Brake modules provide the ultimate in application versatility, from rapid cycling and accurate positioning, to soft controlled starts and stops. These modules come completely pre-assembled, pre-aligned, and pre-burnished at the factory for maximum performance right out of the box.			
	SFP SHAFT MOUNTED CLUTCHES	Warner Electric's packaged stationary field clutches are factory assembled and burnished to deliver the maximum rated torque immediately. In addition, a packaged product assures that all engineering factors regarding the proper alignment of components to one another have been established at the factory. This allows the unit to be 'slid on the shaft' after being shipped to you. The proper alignment of components is critical to achieving maximum torque and assuring long life.			
	TENSION BRAKES AND CONTROLS	Warner Electric offers a comprehensive line of Tension Control products including electric and pneumatic friction brakes, magnetic particle and permanent magnet brakes, and both analog and digital controls. Several different types of brakes have been specifically designed for unwind/rewind/tension applications to provide consistent tension, even during flying splices and emergency stops.			
	WRAP SPRING CLUTCHES	Warner Electric offers a complete line of wrap spring clutches and clutch/brakes, which are particularly well suited for performing indexing, positioning and backstopping functions. Fast, repeatable and positive action provides identical cycling over a long life.			
Bottling Capping	Electro Pack Clutches Brakes	Packaged Performance Products are clutches and brakes which are assembled and aligned at the factory for maximum performance and ease of installation. Offered as clutches, brakes, and clutch/brake combinations, packaged products can be base mounted, shaft mounted, or installed on or between C-face motors and reducers.			
	Magnetic Capping Headsets	Warner Electric magnetic headsets feature constant Smooth Torque Technology; differing with most competitor OEM headsets that have two opposing magnets causing pulsating torque. It's the pounding effect of a pulsating clutch that increases cap tightness during the capping process.			

Carton Case Packing	SENSORS AND SAFETY SWITCHES	Warner Electric has many years of experience in applying sensors in motion control applications. Warner Electric's broad range of innovative and technologically advanced product range offers our customers the exact solution to satisfy their sensing applications. Each model is individually identified with its own certification. Documentation is available upon request.			
Cleaning Sterilizing	ENCLOSED UNIMODULE WASHDOWN	Whether you clean your equipment with air, water, or a mild solution, many clutch/brakes may not weather the storm. Warner Electric's Enclosed UniModule Washdown series (EUM-W) represents the latest in clean, quiet, motion control technology, with sealed enclosures to keep wear particles in and contaminants out.			
	WASHDOWN ELECTRO PACK	Even in the most demanding environments, Warner Electric's Washdown Electro Pack Clutch/Brakes (EP-W) will weather the storm. Designed specifically for use in food, sanitary or any other washdown application, these packaged clutch/brakes are totally enclosed in smooth, completely sealed, rugged enclosures to keep wear particles in and contaminants out.			
Filling	CLUTCH/BRAKE MODULES (EM,UM,EUM)	Warner Electric's Unimodule Clutch/Brake modules provide the ultimate in application versatility, from rapid cycling and accurate positioning, to soft controlled starts and stops. These modules come completely pre-assembled, pre-aligned, and pre-burnished at the factory for maximum performance right out of the box.			
	WASHDOWN ELECTRO PACK	Even in the most demanding environments, Warner Electric's Washdown Electro Pack Clutch/Brakes (EP-W) will weather the storm. Designed specifically for use in food, sanitary or any other washdown application, these packaged clutch/brakes are totally enclosed in smooth, completely sealed, rugged enclosures to keep wear particles in and contaminants out.			
Form Fill Seal	CLUTCH/BRAKE MODULES (EM,UM,EUM)	Warner Electric's Unimodule Clutch/Brake modules provide the ultimate in application versatility, from rapid cycling and accurate positioning, to soft controlled starts and stops. These modules come completely pre-assembled, pre-aligned, and pre-burnished at the factory for maximum performance right out of the box.			
	WASHDOWN ELECTRO PACK	Even in the most demanding environments, Warner Electric's Washdown Electro Pack Clutch/Brakes (EP-W) will weather the storm. INSPECTION	CLUTCH/BRAKE MODULES (EM,UM,EUM)	Warner Electric's Unimodule Clutch/Brake modules provide the ultimate in application versatility, from rapid cycling and accurate positioning, to soft controlled starts and stops. These modules come completely pre-assembled, pre-aligned, and pre-burnished at the factory for maximum performance right out of the box.			
	SENSORS AND SAFETY SWITCHES	Warner Electric has many years of experience in applying sensors in motion control applications. Warner Electric's broad range of innovative and technologically advanced product range offers our customers the exact solution to satisfy their sensing applications. Each model is individually identified with its own certification. Documentation is available upon request.			
LABELING	TENSION BRAKES AND CONTROLS	Warner Electric offers a comprehensive line of Tension Control products including electric and pneumatic friction brakes, magnetic particle and permanent magnet brakes, and both analog and digital controls. Several different types of brakes have been specifically designed for unwind/rewind/tension applications to provide consistent tension, even during flying splices and emergency stops.			
	WRAP SPRING CLUTCHES	Warner Electric offers a complete line of wrap spring clutches and clutch/brakes, which are particularly well suited for performing indexing, positioning and backstopping functions. Fast, repeatable and positive action provides identical cycling over a long life.			
PALLETIZING	ELECTRICALLY RELEASED BRAKES	The Warner Electric line of electrically released, dynamic, spring-set brakes (ERD) offers a high-performance, cost effective solution for power-off load holding applications. These brakes (ERD) are typically applied where dynamic stopping of the load is desired when the electrical power is either accidentally or intentionally removed. They may be applied in any dry environment where a dependable heavy duty braking action is required, with no residual torque in the disengaged position.			
	SENSORS AND SAFETY SWITCHES	Warner Electric has many years of experience in applying sensors in motion control applications. Warner Electric's broad range of innovative and technologically advanced product range offers our customers the exact solution to satisfy their sensing applications. Each model is individually identified with its own certification. Documentation is available upon request.			

Wrapping	BASIC CLUTCHES AND BRAKES	Basic brakes and clutches are user assembled from standard components for optimum performance in the smallest possible package size. A wide range of models and options are available, making them easily adaptable to any mounting requirement. Torque capacities range from 5 lb.in. to 1350 lb. ft., with horsepower capability to 100 HP.			
	ELECTRICALLY RELEASED BRAKES	The Warner Electric line of electrically released, dynamic, spring-set brakes (ERD) offers a high-performance, cost effective solution for power-off load holding applications. These brakes (ERD) are typically applied where dynamic stopping of the load is desired when the electrical power is either accidentally or intentionally removed. They may be applied in any dry environment where a dependable heavy duty braking action is required, with no residual torque in the disengaged position.
